

DTC-02 Diffractive Optical Element

- **Element Number: DTC-02**
- Description: Circle 12 dots
- Substrate material: PET/PMMA/GLASS
- DOE active area: 3.7 x 3.7 mm
- Design wavelength: 650 nm
- Minimum recommended beam diameter (FWHM): 2 mm

Pattern Specifications

A DOE functions with a laser light source that emits a diffractive pattern. Each DOE pattern is characterized by a specific laser wavelength, focal length and transverse mode. Each laser wavelength will result in a different zero order intensity. The focal length is dependent on the DOE and the object distance which can be adjusted using a collimating lens (CL). The transverse mode will affect the dot shape.

Field of View (FOV)	7.15°x7.15° (HxV)
Zero order	≤ 0.5%
