

DTC-03 Diffractive Optical Element

Pattern Specifications

Element Number: DTC-03

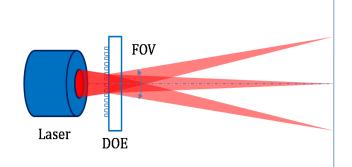

Description: Circle 16 dots

Substrate material: PET/PMMA/GLASS

DOE active area: 5 x 5 mm Design wavelength: 650 nm

Minimum recommended beam diameter

(FWHM): 2 mm

A DOE functions with a laser light source that emits a diffractive pattern. Each DOE pattern is characterized by a specific laser wavelength, focal length and transverse mode. Each laser wavelength will result in a different zero order intensity. The focal length is dependent on the DOE and the object distance which can be adjusted using a collimating lens (CL). The transverse mode will affect the dot shape.

Field of View (FOV)	7.15°x7.15° (HxV)
Zero order	≦0.5%
