

DTC-04 Diffractive Optical Element

- **Element Number: DTC-04**
- Description: Circle 32 dots
- Substrate material: PET/PMMA/GLASS
- DOE active area: 5 x 5 mm
- Design wavelength: 650 nm
- Minimum recommended beam diameter (FWHM): 2 mm

Pattern Specifications

A DOE functions with a laser light source that emits a diffractive pattern. Each DOE pattern is characterized by a specific laser wavelength, focal length and transverse mode. Each laser wavelength will result in a different zero order intensity. The focal length is dependent on the DOE and the object distance which can be adjusted using a collimating lens (CL). The transverse mode will affect the dot shape.

Field of View (FOV)	55°x55° (HxV)
Zero order	≤ 4%
