

DTC-19 Diffractive Optical Element

■ Element Number: DTC- 19

Description: ViewFinder

Substrate material: PET/GLASS

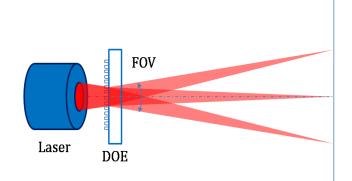

• DOE active area: 5 x 5 mm

Design wavelength: 650 nm

• Minimum recommended beam diameter

(FWHM): 2 mm

Pattern Specifications

A DOE functions with a laser light source that emits a diffractive pattern. Each DOE pattern is characterized by a specific laser wavelength, focal length, and transverse mode. Each laser wavelength will result in a different zero order intensity. The focal length is dependent on the DOE and the object distance which can be adjusted using a collimating lens (CL). The transverse mode will affect the dot shape.

Field of View (FOV)	39.1° x 25.5°
Zero order	≦2%
