

DTC-23 Diffractive Optical Element

• Element Number: DTC- 23

• Description: ViewFinder

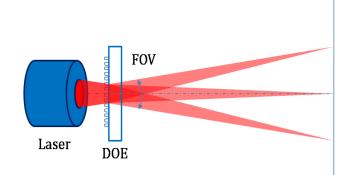

Substrate material: PET/PMMA/GLASS

DOE active area: 4 x 4 mmDesign wavelength: 650 nm

• Minimum recommended beam diameter

(FWHM): 2 mm

Pattern Specifications

A DOE functions with a laser light source that emits a diffractive pattern. Each DOE pattern is characterized by a specific laser wavelength, focal length, and transverse mode. Each laser wavelength will result in a different zero order intensity. The focal length is dependent on the DOE and the object distance which can be adjusted using a collimating lens (CL). The transverse mode will affect the dot shape.

Field of View (FOV)	35° x 35°
Zero order	≦2.5%
